-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:  
  
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
2. Claims 16-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 16 is not clear. The claim appears to include several grammatical errors and cannot be understood at this time. It is not clear if the work and the item are considered to be part of the claimed invention. Correction is required.
4. The remaining claims are rejected as depending from a rejected base claim.

### ***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-3 and 9-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Anthony, US #4,391,053.
7. Anthony discloses an apparatus for framing a work comprising frame 48 (Figure 7), first mat 46 having openings, second mat 40 having a plurality of slits (Figure 9), and mount board 60 positioned to hold the mats and frame in place. First mat 46 is held

in place by mounting points 74 (Figure 7). The work to be framed is threaded through slits (such as 80, 81) then mounted in the frame with the other mat. The work is considered to be a greeting card.

***Claim Rejections - 35 USC § 103***

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claims 4-8 and 13-20, as far as definite, are rejected under 35 U.S.C. 103(a) as being unpatentable over Anthony in view of Plumly, US #5,524,373.

10. Anthony does not teach the surfaces of the mat and mount board as having detachable attachment surfaces, however such surfaces are well known in the art of displays. Plumly teaches a display wherein an advertisement and mat are held with respect to a frame by means of magnetic attachment surfaces (Figure 6). Magnetic layer 31 holds the advertisement in place. It would have been obvious to a person having ordinary skill in the art to utilize such a magnetic layer in the frame of Anthony so as to retain the layers in place while still providing a flat display.

11. As best as claim 16 can be understood, the combination of Anthony and Plumly would provide detachable magnetic surfaces to allow these surfaces to be attached to an item.

12. Plumly also teaches aperture 45 for removing the back. Plumly does not teach the use of a ribbon. It would have been obvious to a person having ordinary skill in the art to substitute a ribbon for the hook used with this aperture as an equivalent means for removing the backing layer. The examiner also takes official notice of additional structures commonly attached to the back layer of picture frames to enable a user to pull the back layer off so as to change the picture.

### ***Conclusion***

13. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patents 3579886, 5353536, 5337949 and 3473246 are cited as of interest.
